

Tak for din interesse i Byggepladens første eventsæt: KF2017 Aarhus Rådhus

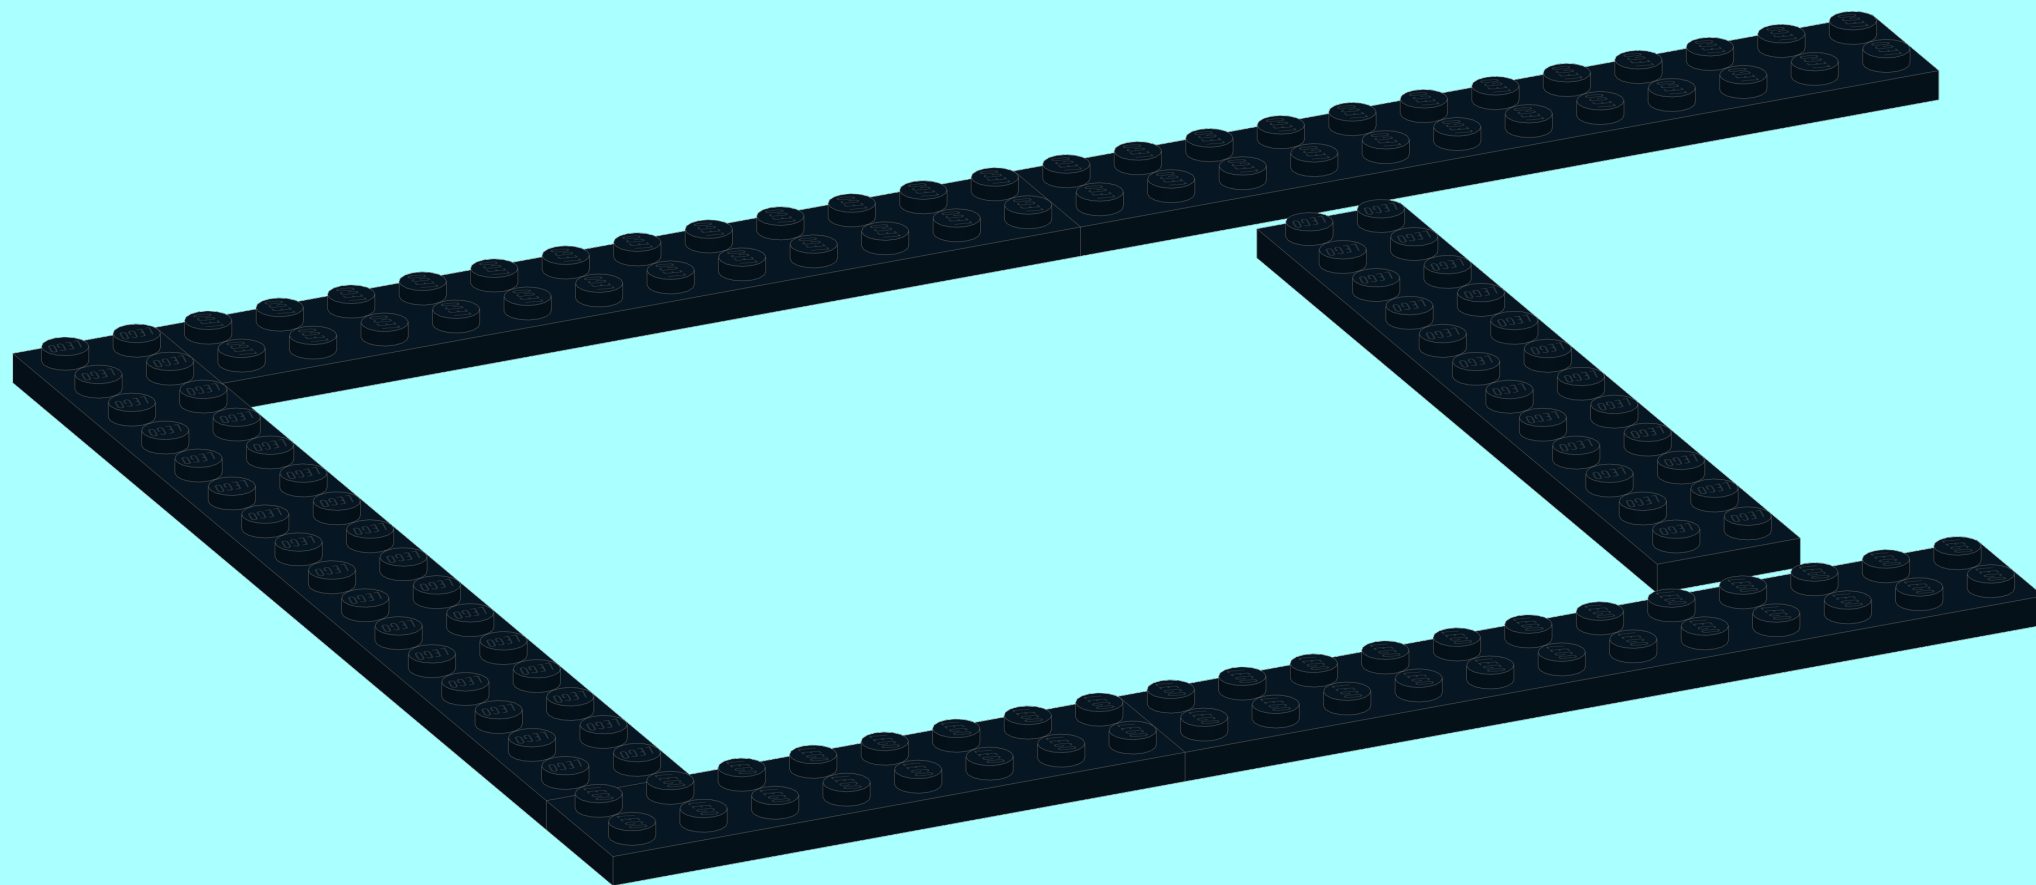

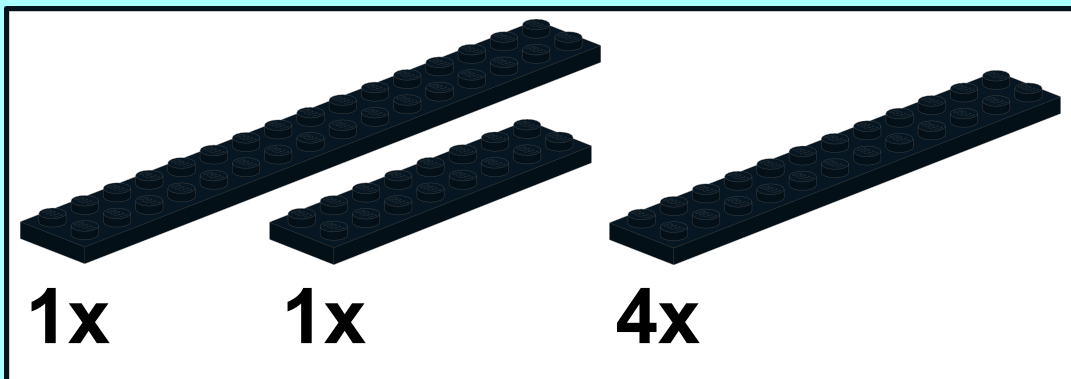

Vi er stolte og glade over den modtagelse sættet har fået, der er gået meget arbejde med at designe sættet, lave byggevejledning + æske og ikke mindst sortere og pakke klodserne til sættet.

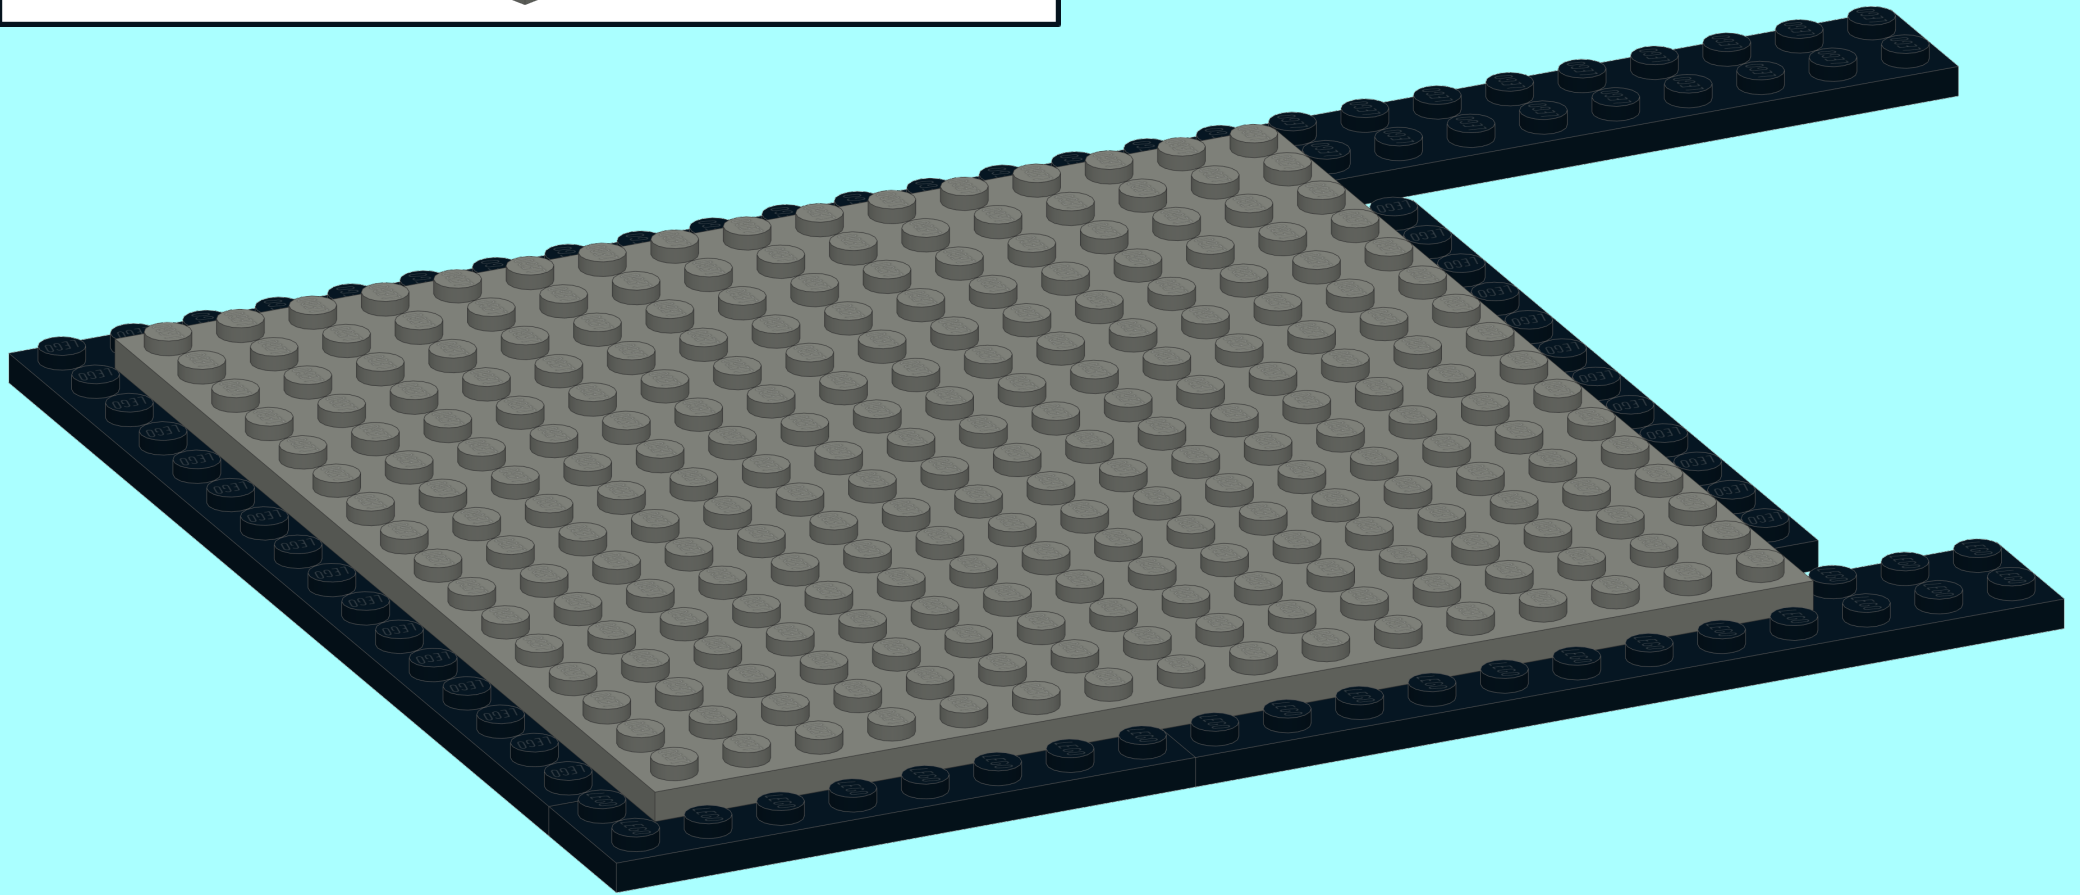

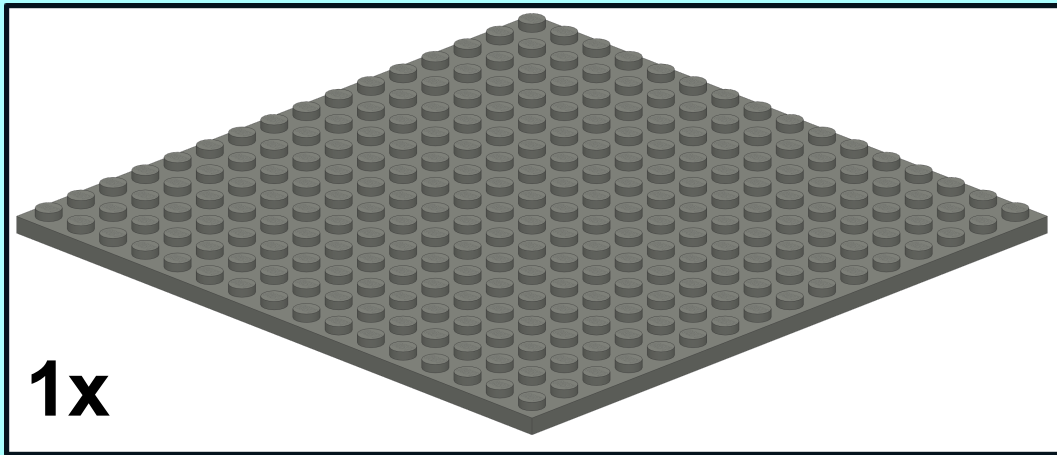

Vi håber du vil påskønne denne indsats ved at donere et beløb til Børnecancerfonden enten via <https://boernecancerfonden.dk/stoet-os/> eller Mobilepay til 4049 4833

Byrådsalen

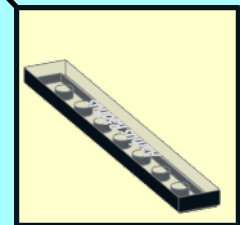

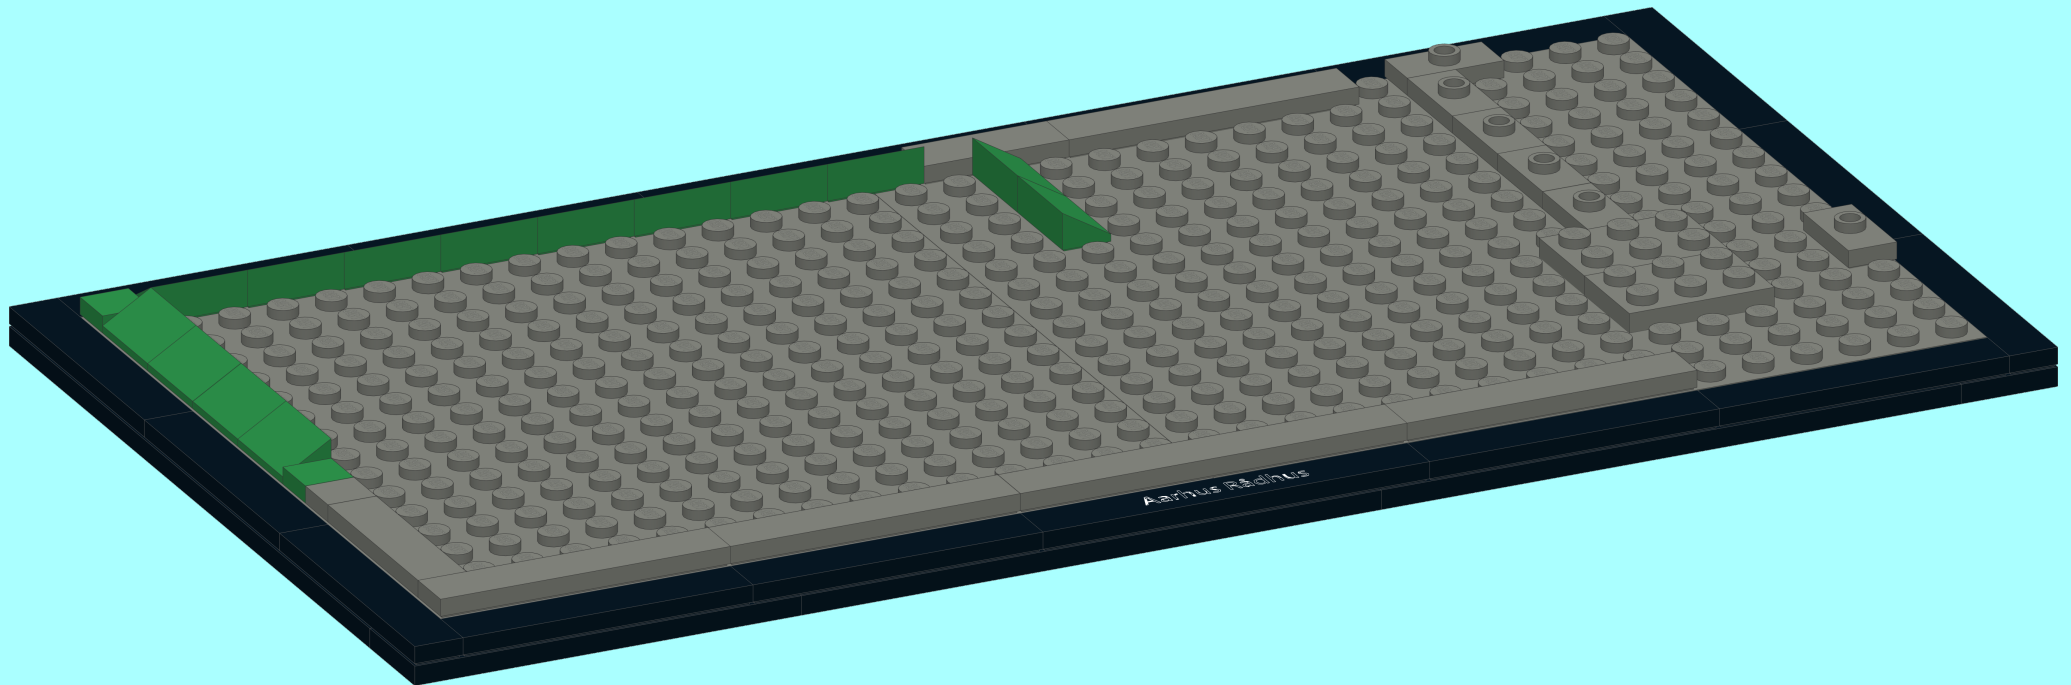

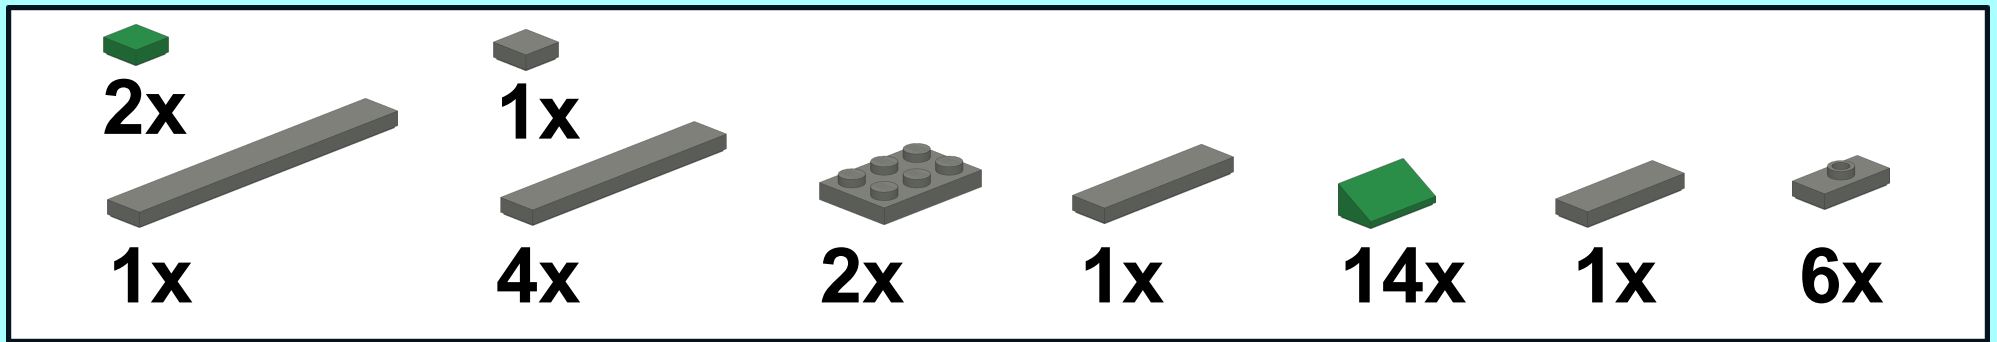

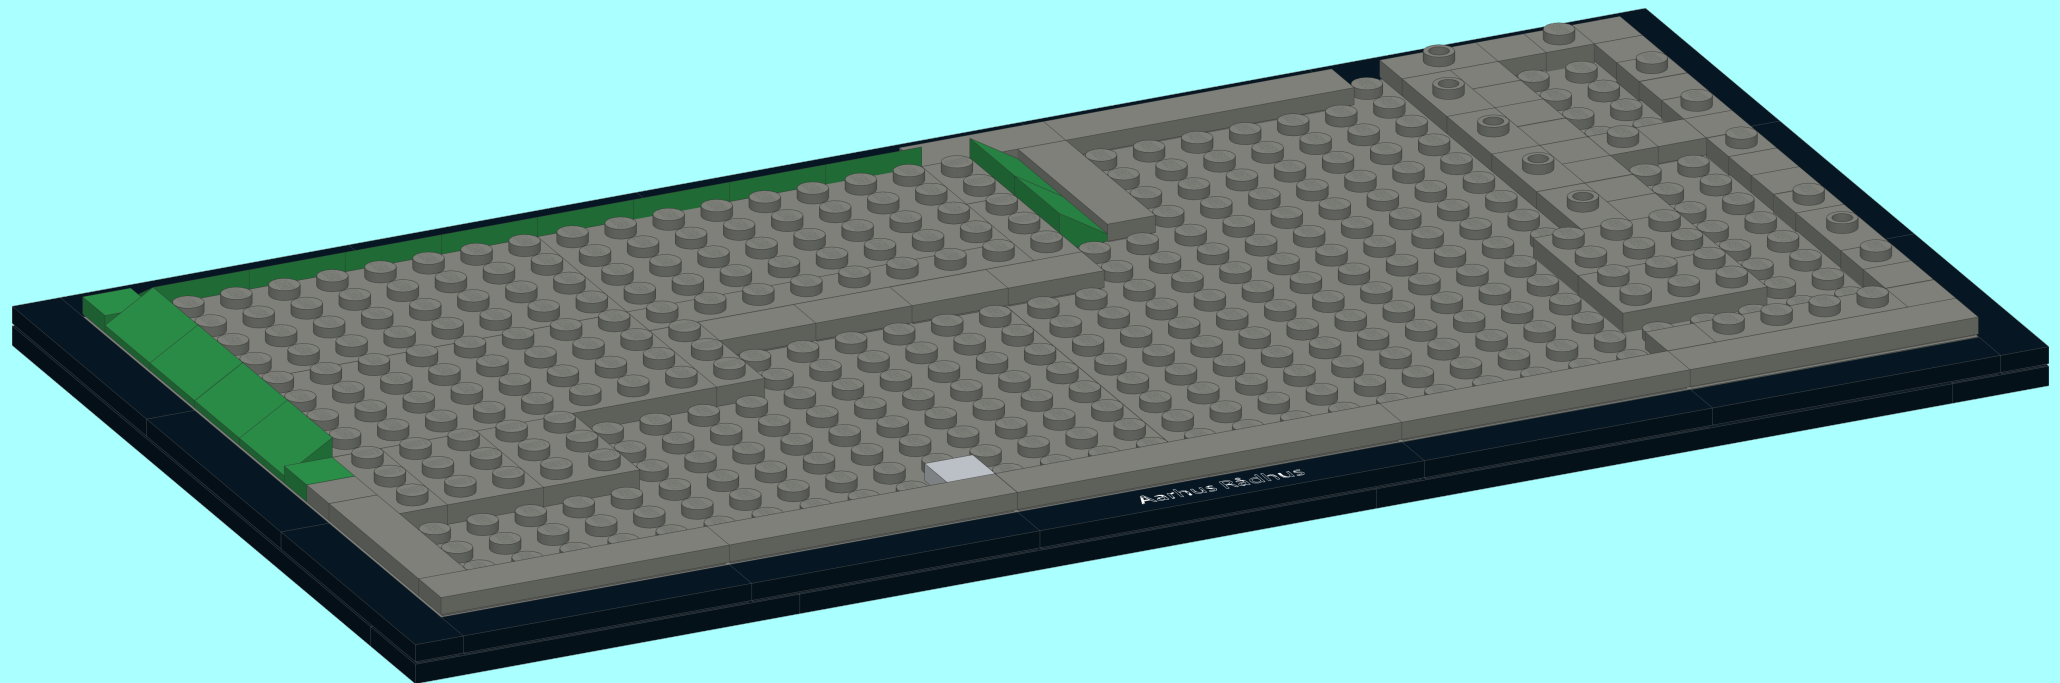

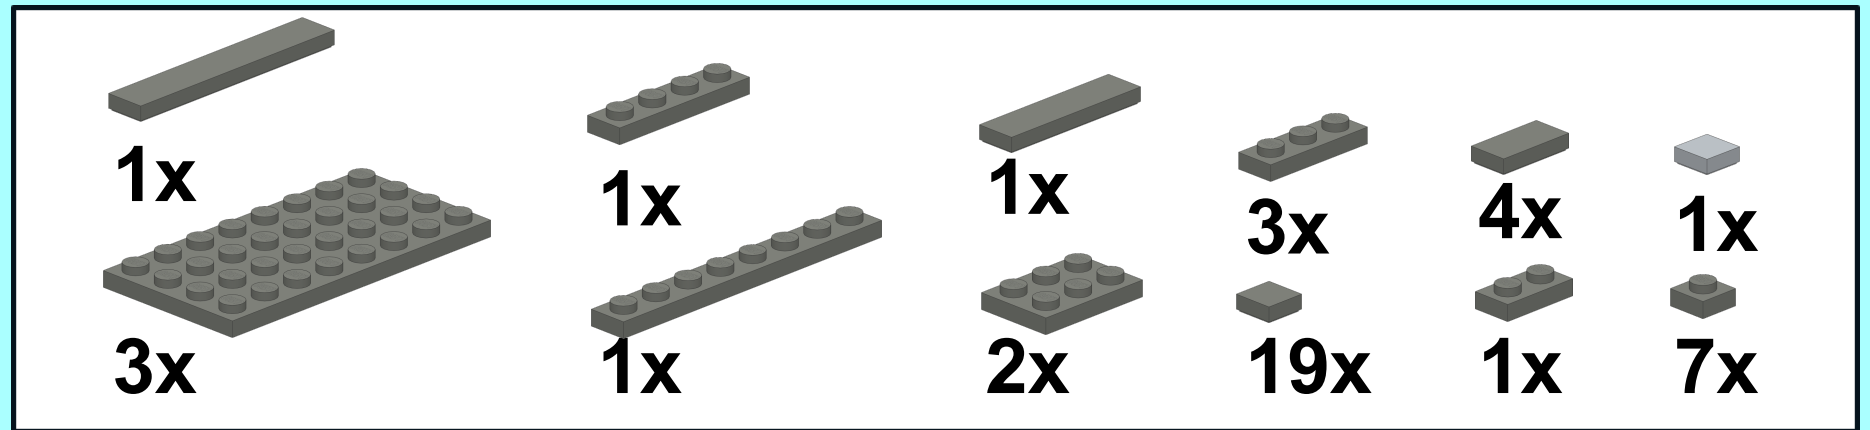

Århus eller Aarhus

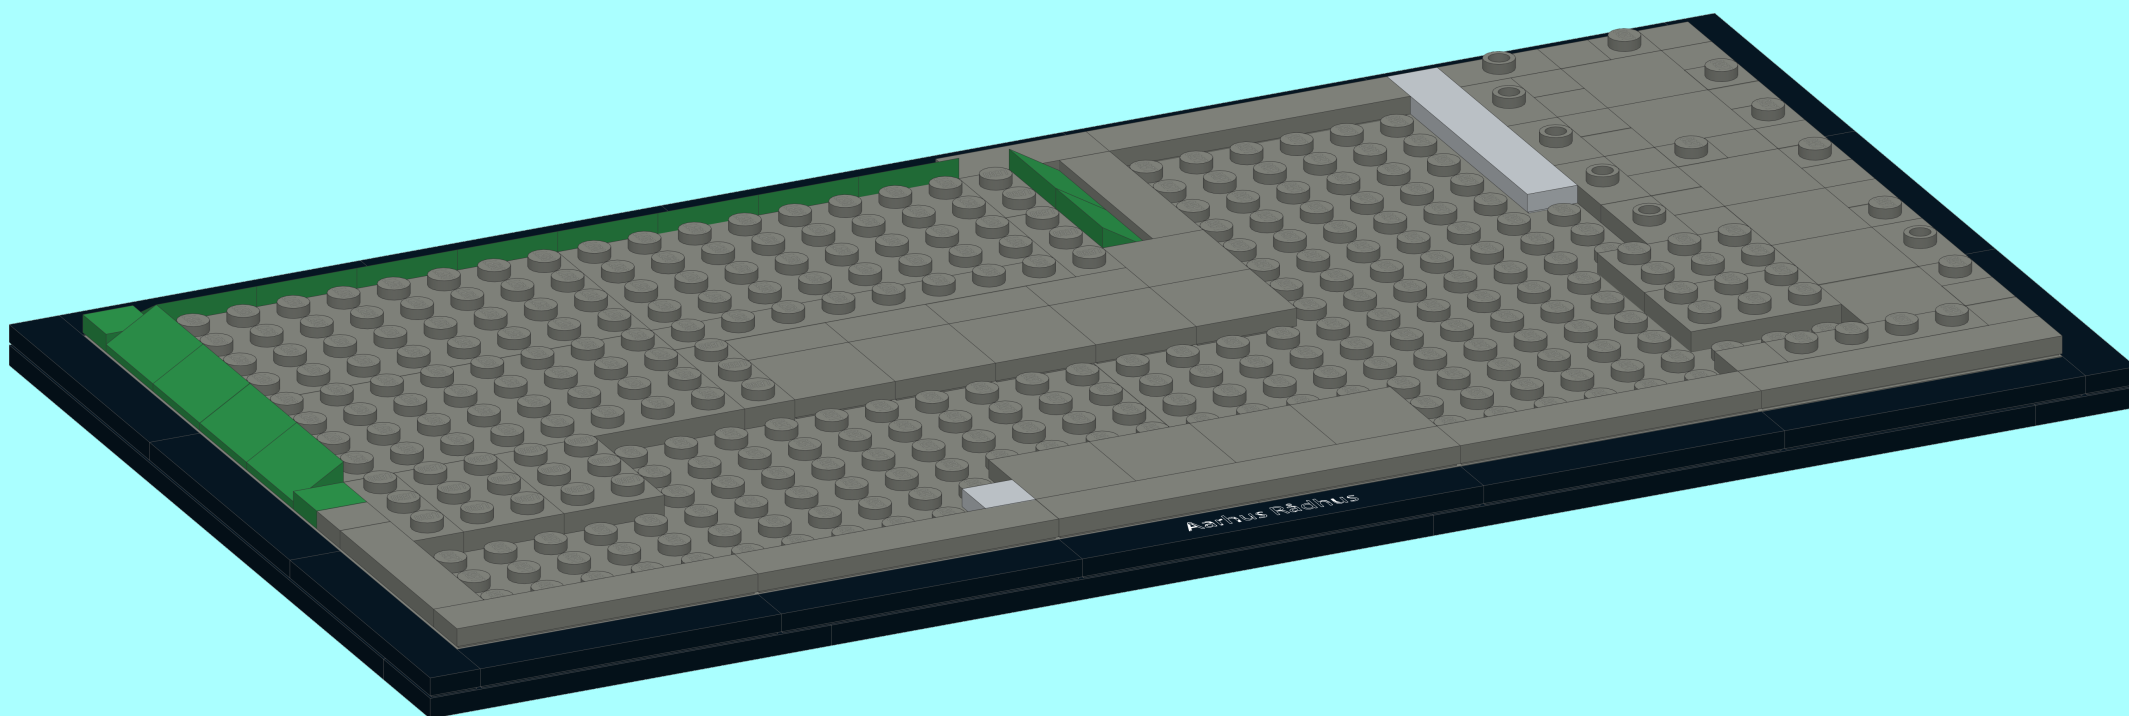

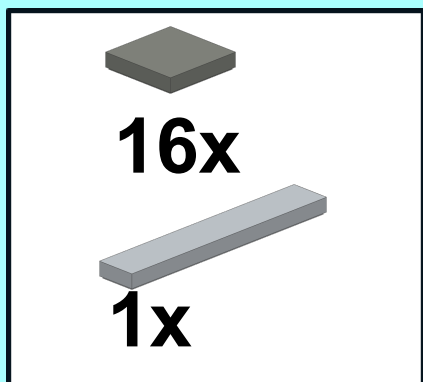

Den 1. januar 2011 skiftede Århus Kommune bolle-å'et ud med et dobbelt-a i sin egen stavemåde af byens navn. Det er dog stadig korrekt for alle andre end kommunens ansatte at bruge bolle-å hvis de hellere vil det.

Rådhuset under 2. Verdenskrig

Rådhuset var sidst i 30'erne og i 40'ernes Danmark genstand for stor folkelig opmærksomhed. Derudover havde besættelsesmagten mistanke om at rådhusansatte hjalp med produktion af illegale dokumenter, derfor blev rådhuset under 2. Verdenskrig to gange udsat for bombeattentat i forbindelse med gengældelsesaktioner for danske modstandsaktioner.

Rådhusetårnet

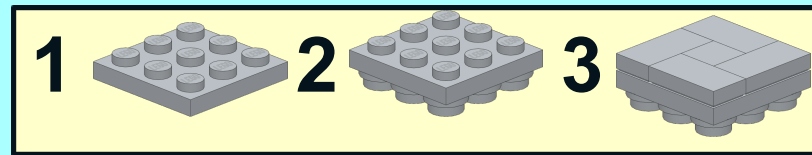

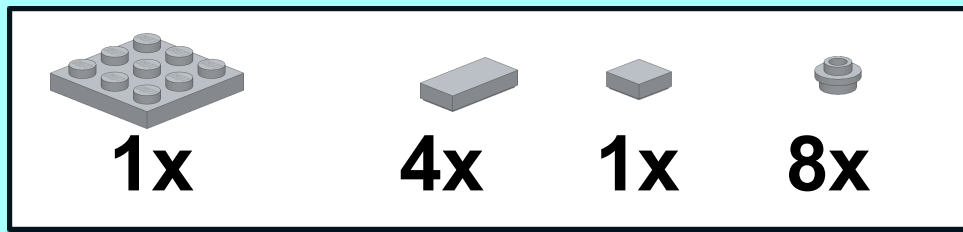

Tårnet er 60 meter højt. Arkitekturen i 1930'erne var meget minimalistisk og med fokus på rene linier. På de første tegninger fra Arne Jacobsen og Erik Møller var tårnet og marmorpladerne derfor ikke med. Politikere og borgere ønskede dog en mere pompøs bygning og foretrak et hævet tag frem for et fladt, men vigtigst var dog et tårn, som skulle udgøre byens vartegn. Taget blev hævet og tårnet kom således til efter et politisk og folkeligt pres.
